Homework Template

Scott LaCombe

You are free to use this document to help format your homework assignments, but don't forget to delete this text and change the name/title. If a question has multiple parts, put the main question with a single # and the sub-parts (a, b, etc) with 2 hashtags. The more hashtags, the smaller the subheading. To render to a pdf, you will need to go down to the tab labeled "terminal" and type 'quarto install tinytex' to that it can render to a pdf.

Question 0.6

Type out text answers in the white space.

```
## Type code in this area (make sure to remove these lines,
# a # indicates it is a comment and not code) see example
# below for actual code (but delete it unless you need it)

library(tidyverse)
library(Stat2Data)
```
